Enemy Number Tokens for Gloomhaven Miniatures.

Print on a resin printer, FLAT on Build Plate

All you have to do is drag and drop the file into your slicer! No supports necessary! All you have to do is get your scraper tool under the overhang on the tokens and they pop right off. No elephant's foot. No wasted resin.

Printed on my Creality "Halot One" resin printer. 0.05 layer height, 4 Initial Layers.

This remix is based on

Gloomhaven Enemy Number Markers
