updated 16. 1. 2024 | published 16. 1. 2024

Summary

Two remixed components to correct issues I had with fitting

[3D Printers](#) > [Other Printer Parts & Upgrades](#)

The STLs have been sent to Cura and then exported.

I exported them as STL binaries, but also as 3MF files, use whichever you wish. The 3MF for the Chain Base Mount includes my setting overrides, which just turns off buildplate adhesion and turns on the right amount of support. All files should turn up in slicer in the correct orientation for printing as they were exported in that orientation.

This remix is based on

Cable Chain for Elegoo Neptune 3 PRO

by Šimon Condorik

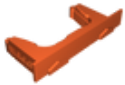

Model files

chain-base-mount-remixed.3mf

chain-base-mount-remixed.stl

z_mount_remix.3mf

☐ Includes my support overrides

z_mount_remix.stl
