X1C / P1S Handle Notice / Warning Sign | Do Not Disturb

Stop people disturbing your X1C / P1P during a long print with this handy notice sign that cannot be avoided.

Simply slides over the handle, easy to remove. It has a snug fit to avoid rattling while the printer is doing its thing.

Prints face down, the over hang for the handle slot prints with ease using PLA with Default Bambu Slicer settings and does not require any supports.
