Tags: [lamp](#) [lithophane](#) [multicolor](#) [tv](#) [litho](#) [lithophanelight](#)

This is a cover for the litho lamp showing the "EVERY SECOND COUNTS" sign as shown in the 2nd season of the TV show "The Bear".

The white layer is 1.4 mm thick. The color should be switched at the layer above. The filament swap is already configured in the .3mf file (tested with my Bambu Lab printer).

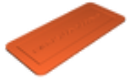

The box to put the cover and the lights in can be found here: <https://www.printables.com/model/477949-litho-lamp-base-components>

I recommend printing the cover with 100% infill, as otherwise you will be able to see the infill pattern through the cover when the light is turned on.
