### Summary

This covers disables the robot ability to climb on the game elements. I made them for 96mm Mecanum wheels.

[3D Printers](#) > [Accessories](#)

Tags: [robot](#) [wheels](#) [cover](#) [ftc](#) [centerstage](#)

They are made for the Centerstage event, but I consider that they are good for other FTC events. I made them for a standing motor. Search @ltasrob on Instagram and you could see the motors from the front of the robot and the wheels. I will update the photos when the covers will be ready.
