Summary

Use two 1 inch dowel rods (or pvc pipes) and a couple rubber bands to create extra storage for spools of filament.

The paper towel holder is optional. I made it because I use paper towels with some spray bottles of water and IPA.

The Shelf Platform is also optional. I made it because I couldn't put rolls over a certain part of the fixture (obvious where in the pic), but I also had need for somewhere to stow smaller items (like a 250g spool).
