This is a thin plate that has holes at the bottom where you can fit 3 or 4 5mm magnets to hold your miniatures. Plate has exact size of **Multiboard 7** Multiholes, **Push-Fit Shelf**. Size of this shelf allows to display up to 4 miniatures on standard warhammer base with maximum size of 40mm. Although you won't be able to use 4 holes variant for 4 bases of 40mm diameter.

It's done to work with my **magnet filled base fillings**. Just remember - always make sure that your magnet orientation is correct.

Holes for magnets are tight fit, but you can use simple tape or glue - holes are at the bottom side and therefor invisible when placed on shelf. In any case magnet placement does not have to be final - if you want to change orientation for example.

Print:

0.2mm, no supports needed
