Summary

Freddy the Frog would fit perfect in anyone's home or office decor! Just add a fake (or real I guess) plant and have fun

Fred the frog is a sculpt based on a small frog pot I found at my local dollar store.

I also picked up some fake plants, glue and aquarium rocks, so I could make this project come together!

print settings:

does not need any supports, I was printing at 0.2 using cura as a slicer

Model files

freddy-the-frog.stl

📄 Edited slightly from the test one I printed to improve details!
