Travel cards to carry in your wallet, for whenever you reach for a guitar and can't find a pick.

Simply twist and pull the pick off.

Based on Mikolas' pick collection.

Has both regular flat version and beveled version - I'd suggest trying all versions to find the best one for you.

Same picks as Mikolas' but with a slight bevel all around the pick. This gives a more "on point" and clear sound and is more comfortable overall.

"A set of 4 pick shapes - Standard 351 guitar pick, Jazz pick and, Triforce pick and the Sharkfin pick."

I'd suggest a resolution of 0.1mm for the beveled picks.

I print the jazz pick card at 0.1mm and with a thickness of 0.9mm.

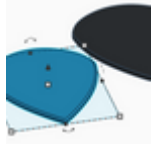

Print flat on the print bed.
