Summary

Container is used to hold Taom brand round chalk.

Taom remix to tighten up the fit of the standard round chalk to holder. Original design was solid and worked but chalk had a little too much wiggle room. I believe the original design was made/designed to store chalk while not in use to prevent chalk from drying out. I want to expand and allow the container to not only keep chalk fresh when not in use but to also hold chalk while playing. By adding the hole and using hardware from another holder I was able to attach to my holder and have chalk accessible hanging from my pocket during play. I also added a small Velcro sticky tape to bottom of chalk to help with adhesion. Great original design

This remix is based on

Dose für Billardkreide Taom
