Summary

A Fedora hat to fit 3DPrinty's excellent Snowman. Scaled and remixed from "Fedora hat" by outofbase.

Tags: [snowman](#) [fidget](#) [seasonal](#)

Printed with supports. You can lay it a little flatter on the build surface, though I don't bother.

Be careful removing the supports, though I find they come off easily and pretty cleanly. If necessary, a little attention with a scalpel blade with remove aony tiny bits of support left, and a very brief application of a lighter flame with remove any white stress marks from supprot removal.

This remix is based on

Fedora hat
