Tags: [model](#) [architecture](#) [miesvanderrohe](#)

The new model in our section of architecture.

Print a model of one of the most relevant icons of the architecture of the genius Mies Van der Rohe.

The model has certain simplifications to be able to print it at a 1/75 scale on a 220x220 mm printing bed.

The model is currently incomplete because we do not have a clear idea of how to make the glass and metal profiles of the windows. Can you give us any ideas about this in the comments?

We hope you like it and if you need anything you can contact us by leaving a comment or more immediately on our Instagram account.
