Summary

This is a replacement for the simple piece used to mount the shield to the back of the HG Maganac.

I picked up a secondhand HG Maganac and it was missing the Shield connector for the back of the model so I created one in Blender.

Settings I used are as follows:

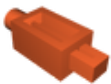

- Printer - Ender 3 v2
- Slicer - Cura 5.3.0
- Filament - Creality PLA
- Super Quality - .12mm
- Wall count - 4
- Supports - Yes
- Orientation - Horizontal
- Adhesion - Brim 20

I did have to trim a little from the bottom support but it fit well.

If you want to paint it to match, [Mech9.com](https://www.mech9.com) shows the MR Hobby colors you would use are:

- White (H1) (80%)
- Light Blue/mizu (H45) (10%)
- Gray/Nezumi (H22) (10%)
