Remix of <https://www.thingiverse.com/thing:4440891>

Modified the knob to show the selected setting on the face of the knob. Check diameter to make sure it fits your switch.

Top cover has a notch in it to point to the correct setting on the knob.

Bottom case has integrated cold shoe ideal for Reveni or small meter. Added "feet" stabilize the dongle when installed.

See print orientation image. 15-30% infill depending on your material. Ideal to print at 0.10 (knob especially), but everything else can be printed at 0.16-0.20mm (knob will depend on your material). Looks awesome in clear material!
