Summary

A way to scrape ice from your items

[Household](#) > [Garage](#)

Tags: [window](#) [ice](#) [car](#) [snow](#) [scraper](#) [windshield](#)

A simple scraper with some nice visual elements and good toughness. Print at 20-30% infill, 3-4 perimeters, in something like PETG or ABS. The front tines are a little small but even if you lose the leading edge just trim them up with a knife. Should last many scrapes.

If you download please leave a like, and if you print it upload a make! Every bit helps!
