Summary

Designed this to convert my pin style name tag to a magnetic style with backing plate

[Fashion](#) > [Other Fashion Accessories](#)

Tags: [magnetic](#) [nametag](#)

Used superglue to attach 10x2 magnets to name tag and printed backing plate.

Originally designed with square corners (not very comfortable if using against skin), then added rounded corners to make it a bit less uncomfortable.

Print settings (on a P1S textured plate)

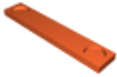

- .2mm height
- outer brim
- no other supports

uploaded .3mf files for Bambu lab printers
