### Summary

A cable bracket to secure up to 5mm diameter cable in place by up to 4mm screws.

Tags: [holder](#) [cable](#) [bracket](#) [loop](#) [screw](#)

Super simple model that I made to secure LED strips in place as the adhesive was not strong enough to hold it over time, but it could be used in many other ways.

Cable slot is 5mm wide and screw holes are 4mm.

I printed these on a side so that the curve is strongest, but I'm sure it would be strong enough printed flat with the curve bridged without supports.
