Summary

Simple parametric model for holding vape juice bottles

[Hobby & Makers](#) > [Organizers](#)

Tags: [vape](#) [vapejuice](#) [nicotine](#)

Simple parametric model for holding vape juice bottles. Should work with nic-salt and regular juice bottles.

The only parameters that should be edited are 'bottleDiameter', 'numBottlesWide', and 'numBottlesDeep'. There is also a 'bottleHolePadding' parameter if you want to add your tolerances for the bottle holes.

Model defaults to 31mm bottles, the standard nic-salt juice bottle as far as I'm aware of.

I've included a single 1x5 bottle rack STL as an example. Holes are 31mm bottle size with 1mm of padding.
