Someone I know is making a Holga cosplay from the Dungeons and Dragons Honor Among Thieves movie. They wanted the chest piece for their costume but couldn't find one so I took some screenshots and traced over it in Fusion360 and 3D printed it.

I used a heat gun to melt the edges of the stag (I had trouble filleting the edges without an error) and also form the chest piece into a convex shape like the one in the movie. Going to give it some "battle damage" and paint it as well.
