### Summary

Need moar distance between sensor and wall? No problem!

Tags: [wall](#) [holder](#) [space](#) [mount](#) [wallmount](#) [sensor](#) [xiaomi](#) [aqara](#) [xiaomiaqara](#) [ceiling](#) [temperaturesensor](#) [temperatur](#) [tuya](#)

Holder / Mount for extra large distances from the wall.

I used this holder to get a more accurate temperature outdoors without interference from the wall.

You can drill a hole for a screw or (like me) use double sided tape for mounting.

Printed in PETG with 0.3mm layer height - better not to use PLA due to the proximity to the outside temperatures. No supports or brim needed.

STL file size: I don't know what happened there....

Do you like my work? I would be very happy if you would support my work on [Ko-fi](#).
