Tags: [filamentspoolholder](#) [filamentspool](#) [ender3v2](#)

I'm using the original Ender 3 V2 spool holder. Using filament from 123-3D.nl the inside diameter of the spool was too large. Using [this adapter](#) is was able to make it fit, however there was too much room on the sides of the spool, making them roll off.

Using this ring I can make the fill the gap.
