Summary

I made a guitar pick with the Horde symbol

[Hobby & Makers](#) > [Music](#)

I made a guitar pick with the Horde symbol. I think it is nice to see and you can print it very easily. You can choose the right dimension for you. Just rescale without uniform scale active. It works very well between 1mm to 0.58mm.

No Support, No Draft.

Layer 0.1

Wall Loop: 3/4

Ironing: on
