Divider for **1.3 liters (44 oz) IKEA 365+ Dry Food Jar**, designed to store two different kind of pasta (or whatever you like) in a single container.

The fit is precise but not extremely tight, so it's not suitable for things like flour or grounded coffee.

The upper “fin” fits into a notch in the middle of the standard lid, so it won't bend even under a fair amount of weight when the container is tilted - see attached pictures.

To use the opposite compartment, simply flip the lid.

Print in PETG or other food-safe materials.
