This **Controller Holder** for the Ikea Skadis board is easy to print and uses special pegs that I have designed. These can be found here:

Skadis/ SKÅDIS universal short peg

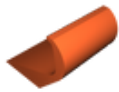

The reason for a separate peg from the organizers is that it enables you to design different plates if you get another type of board in the future without having to throw away the organizers. In addition, the optimum print alignment can be used and the hooks do not break off as easily as with many other designs.

If you would like to see more of my designs for the Ikea Skadis board, I have created a collection here:

Skadis hardware

I'm always happy to receive feedback!
