### Summary

A small print in place table that uses single lines of filament to support it.

[Household](#) > [Home Decor](#)

Tags: [printinplace](#) [table](#) [tensegrity](#)

A tensegrity print-in-place table that prints without supports.

When printing use the 0.3mm layer height, make sure 'detect thin walls' is checked and put your seams at the rear. When sliced you should be able to see the single strands of filament and there should be no empty layers.

Any problems - message me @3DPrintBunny
