This TicTacToe is an extended version of the normal variant.

How to play:

The game starts with the cross in any place. Each player has 4 figures. Now each player can take turns performing an action:

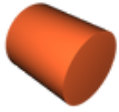

1. place a pawn on a square of choice
2. move one of your already placed pieces
3. move the cross.

The winner is the one who has 3 stones either straight or diagonally in a row, as in the normal TicTacToe

you need to print 4 of each figures

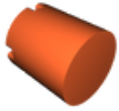

Have fun playing :D
