Fairly simple desk organizer using a pattern of heptagons... because I thought it was neat.

This prints extremely well with dual-extrusion silk PLA. I set the outer wall speed to 40mm/s to ensure a consistent sheen.

All other setting can be left at defaults. No supports needed.

Note that this is fairly large and uses about 175g of filament. You want it to have some weight, though, so it doesn't fall over. This is quite sturdy.

☐ This is an intentionally slow print to ensure consistent sheen on silk PLA.

desk-organizer.3mf

☐ Default print profile for normal PLA, etc.
