Summary

I got a Tina 2 Basic for review, and it needed a full size spool holder bad, V2.5 is live and the better option.

I got a Tina 2 Basic for review, and it needed a full size spool holder badly, V2.5 is live and the better option. Link below. There are some out there, but I found they all had some issues. So I made this to tackle a few of those issues. I moved the post further out, because the three I tried first all had the spool hitting the extruder lever. I Fileted all the corners so it resists corner lifting during printing. It is too tall to print on the TINA 2. So you will need another printer to print this, But I am in the process of designing one that is two pieces and will be printable on the TINA 2. I made it just as strong as the others, but reduced needed filament.

V2 is being printed to test now. It can be printed directly on the TINA 2. I will update this to reflect it's being posted. If you appreciate the design you can always tip on paypal @CryptoDestro V2 is live and can be found here. Has gcode and

tuned profiles for the TINA 2/2S <https://www.printables.com/model/734087-tina-2-spool-holder-v25>

You can follow me on Twitter/X @TweetThreadFred Instagram @3nt4ngl3 Facebook www.facebook.com/inT4ngl3 I do do custom design work if you need that.

I print things to be strong so I use 5 walls and 25% infill. I run Klipper on all my printers and that means i can't upload gcode here, as the macros get flagged.

If you appreciate a tip would always be welcome. You can PayPal me @ paypal.me/CryptoDestro
