Tags: [bosch](#) [dustextraction](#)

A converter duct allows a Henry Numatic vacuum cleaner hose to be attached to a Bosch orbital sander, replacing the OEM filter unit. Thus reducing the dust output while in use allow for a cleaner working environment and reduced inhalation of dust by the user.

The printed part utilises the same functional feature that the OEM unit has the retaining clip locating the converter underneath the handle of the sander and release/retainer clips to allow the converter to be retained and removed both during and after use.
