Summary

Pen holder designed for 4 8x3mm magnets to be press fit

[Household](#) > [Kitchen](#)

Pen holder designed for 4 8x3mm magnets, the magnets can be press fit into the holes. if you do not select print thin walls the holes will go all the way through, that seems to be better, the magnets are easier to insert that way and still hold well.

This remix is based on

Magnetic Pen/Pencil holder for fridge or etc
