Summary

A little radio mount I made for my Tenere 700.

Tags: [yamaha](#) [radio](#) [motorcycle](#) [tenere](#) [tenere700](#)

A little radio mount I made for my Tenere 700. Has the hole pattern of the Oxford Heaters controller so any mounting bracket for those should work. I used [this](#) Oxford mount and mirrored it to mount next to my dash.

Printed with 15% infill and 3 walls using overture PETG.

Supports only needed for the hole in the center.

This remix is based on

Tenere 700 heated grip controller mount
