Tags: [toolholder](#)

I couldn't find a tool organizer for my print station that met my exact needs so I said "to hell with it" and made my own. includes inserts for IPA bottles, hand tools, scrapers, glue sticks and a "Catch All" tray at the bottom for random odds and ends.

Recommended minimum print with 2 walls, 10% gyroid infill with 3 top layers, .2 layer height. bed adhesion is optional as it is a giant square.

Including the Step file for those interested in changing the model to fit their own needs, I would love to see what some of Y'all come up with!

added the STL, 3MF and STEP files for a variant with horizontal caliper/tool storage just above the catch tray for those interested.

Model files

catch-all.step

catch-all.3mf

catch-all.stl

catch-all-with-caliper-storage.step

catch-all-with-caliper-storage.3mf

catch-all-with-caliper-storage.stl
