### Summary

I had problems with my phone staying up on this wireless stand, so I made this so I don't have to take the case off.

When I had my case on my phone it would slide down on the magnet ring, so I made this to fit right on the magnet ring and holds your phone up. I used a little hot glue on the back to hold it on because it would slide off over time. Hope this helps you! Happy printing!

The Anker stand I have is linked here!
