### Summary

My workstation has a bullnose edge that needs a special type of headphone holder to clamp on the edge.

Tags: [holder](#) [headphone](#)

My workstation table has a bullnose edge that descends below the edge of the table top about 3mm. This means a standard clamp on holder does not work. I designed this to allow the holder to flex over the lower section of the bullnose trim and secure the headphone holder to the workstation table without any clamping mechanism. Printed on an OPXL2H with input shaper at .32LH speed.
