[phoneholderstand](#)

A spacer to offset your wireless charger so that you can use it with the [Mobile Exo-Suit](#) phone stand.

I only tested this with my [Anker A2503](#), but I don't know why it wouldn't work with any 100-mm diameter charger.

Instructions

1. Print one spacer
2. Slip it over the Phone Support pins of the **Mobile Exo-Suit**
3. Place you Qi charger on top of the spacer
4. Place your phone on top of the phone support pins, in front of your charger
