Voron V0.2 r1 Phat Plinth!

After building my second V0 I started looking at the aesthetics a bit more closely.

Don't get me wrong this is an awesome machine and a joy to print with, so much so I'm building a 3rd!

But I wanted to enhance what the printer already had and make it a little bit cleaner.

The skirts and feet have been drawn out to meet the panels and panel clips.

This to me gives the Plinth / Skirts that little bit more beefiness and the printer a slightly cleaner look that I think works really well.

As per the norms

Please follow the Voron Printed Parts guide

4 perimeters

5 top / bottom layers

40% infill

All parts have been laid out on a V0 bed to keep it nice and easy.
Just download the models, slice and print!

feedback is always welcome

and don't forget to upload your makes!
it's great to see how these turn out!

Happy printing!
