Summary

KA-BAR knife modeled to scale.

[Costumes & Accessories](#) > [Props](#)

Tags: [prop](#) [knife](#) [marines](#) [marine](#) [realistic](#) [kabar](#)

A model I originally made as a gift for a veteran. 3D printing makes this a much better gift and it turned out great. Enjoy!

The STL file is modeled to scale.

The .3mf file is shrunk down to fit on a Bambu P1S. Also added engraved text in similar fonts to the Marine knife.

EDIT 2/11/2024: Updated .3mf file to print full scale knife.

My print settings:

- 0.4mm nozzle
- 0.2mm layer height
- 15% infill
- Supports YES (Tree auto)

Printed standing up to avoid artifacts caused by supports.

Model files

kabar.stl

☐ Modeled to scale.

kabar.3mf

☐ Full scale and shrunk down models with engraved text.
