I bought an ikea pegboard, and was amazed by how few hook variants there were. Had some tools that just wouldnt fit with the given hooks. Made a few here and plan on uploading more as I find more things to hang. A basic longer hook for wider objects, a spool or tap roll holder, and a special circular one I made for hanging a heat gun but could be scaled for other various objects. Additionally, I added just the base part (called hook_base.stl) which hooks onto the peg board and can have anything added to the hanging end. This was made for the IKEA brand SKÅDIS peg board, which has roughly 6mm across pill-shaped holes spaced 34 mm (1 1/3 in) apart. Hope that this helps somebody out there. If so, leave a like, like, remix, comment, or share! Thanks and happy printing!
