The doors are assembled by using filament as hinge rod. Insert it from bottom and up.

The fridge is sized to fit with Sylvanian families the material should be thick enough to be re-seized to also fit Playmobil. Just contact me if that doesn't work and you would like me to update the design.

More information and images regarding the design and print orientation etc can be found in blog post [Fridge](#) at Enely's 3D.

## Included fridge props

Cheese and cheese plate

Milk bottle

Ceramic bottle

Honey jar
