New updated version with more controller support now available here:

[ULTIMATE MODULAR GAME CONTROLLER ORGANIZER by Replicrafts | Printables Store](#)

This is a set of modular controller stands for multiple game consoles. Current set includes stands for Xbox 360, Xbox One, Gamecube, Nintendo Switch Pro Controller, Steam Controller, and Playstation 4 controller.

They're designed to snap to each other, and work in almost all combinations. The Steam controller is the only one that cannot be behind a Gamecube controller due to the unusually large size of the Steam controller.

A spacer is included for wired gamecube controllers, so there's space to place the coiled up cable and rest it besides the controller (see pictures).

These are all modeled using official controllers, not sure about fit of third-partys.

The original idea was to make a stand for every single controller out there, including classic n64/psx, plus making a version to hang on the wall. However, lack of resources at the moment made me stop at 6. If there's enough demand then there may be more coming.

All were printed on a Prusa i3 mk3, at .20mm without any supports, using 15% infill.
