updated 25. 2. 2024 | published 25. 2. 2024

### Summary

GoPro Hero rugged hard case. Designed for the Hero 12 but fits other models too. Easy to print and requires no supports.

This is a simple rugged hard case for the GoPro Hero 12 action camera. While design to fit a GoPro Hero 12, others have used this for their Hero 9 without issues. Might fit other models as well but I only have the Hero 12 to test. It is designed to fit the bare camera without any camera case or screen protector.

- The design uses M3x20 screws
- Insert a thin foam pad in the top lid to prevent the camera from moving up and down in the case.
- Use glue or thin double sided tape to hold the insert to the bottom case in place if it is too loose and comes out when you take the camera out.

### Recommended print settings

Layer height: 0.2

Wall loops: 3

Infill: 20% gyroid

Support: none

Elephant foot compensation: 0.3
