(3/28/2024) Added a new 3mf version that is ridiculously subdivided. Dont think it changes it much. but if someone wants to give it a go. Its named the same VSKUL only its 31mb

Its a stretch to say this is an original model. It's a scan from a Halloween nick knack at a big box store. The UVs were upscaled, (didn't help much) I tilted her head. Widened her cheek bones, pulled in the veil closer to her neck and body. Did some basic sculpting of the cloth to give it more depth. I've seen this around for a while and always thought I would be neat if someone did it up. Got tired of waiting. It works well enough.
