Original size has inner top diameter: ~90mm, inner bottom diameter: ~64mm, inner height: ~74 mm

Print inner part in vase mode (you may set extrusion width).

Outer basket (mesh) to be printed in normal mode. Make sure your filament does not string much.

Both parts are pretty thin, so be careful.

Inner part shall fit well into the “basket”. If it not fitted well you may do a little sanding of basket inner side (just to eliminate overhangs). Or just lightly blow the basket by a hot-gun while putting together.

If you wanted a model that is easier and faster to print then see this model: <https://www.printables.com/model/738153-voronoi-vase-flower-pot>
