## Summary

Remixed the soldering iron holder for the Dremel workstation so that my soldering iron fits.

[Hobby & Makers](#) > [Electronics](#)

I modified the soldering iron holder from [https://www.printables.com/de/@John\\_248786](https://www.printables.com/de/@John_248786) and clamp to fit the dimensions of my soldering iron.

I use this soldering iron [https://www.amazon.de/dp/B08R3J9GRV?ref=ppx\\_yo2ov\\_dt\\_b\\_product\\_details&th=1](https://www.amazon.de/dp/B08R3J9GRV?ref=ppx_yo2ov_dt_b_product_details&th=1)

The clamp and holder are attached with 4x M3x16 mm screws, and you should also insert 4x M3 threaded inserts into the holder.

I printed the mounting in rPET from Formfutura. To see if it could withstand the temperatures, I set my soldering iron to 450°C and left it on for 10 minutes.

It worked completely fine.
