This mid-century desk lamp requires Bambu Lab's [lamp kit](#). The lamp is comprised of 3 parts:

- Lamp
- Lamp Base
- Stand

To help conceal the cord, the stand has a built-in cord holder.

Filament Choice

Your choice of filament for the lamp is dependent of the look that you prefer. White would be the logical choice, but a light brown/tan also looks nice. Keep in mind that more light will transmit through a regular PLA versus a matte PLA. However, both can look nice.

Print Settings

No special settings are required.

The following filaments were used in the pictures above:

- Bambu Lab Basic Jade White PLA
- Bambu Lab Matte Dark Brown PLA
