Printables would not let me upload as a remix from another site. This is not my model. Original - <https://www.thingiverse.com/thing:5758493>. I never like how my router plates (Mag-LOCK) were lying around and unorganized. I altered the numbering (1" was in there twice and missing one size). Unfortunately I made the model using .6 nozzle and I think a .4 would have done better for the numbering. Also I thing if the numbers would have been done for MMU (flush) it would even have been better yet. I will redo the model later (got parts for my enclosure and that has become more of a priority now.
