### Summary

One of the feet on my RoadTrip grill broke so I printed replacements!

Original on the left, replacement on the right.

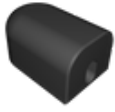

One of the feet on my Coleman RoadTrip 285 broke. I wasn't able to source a replacement so I quickly designed and printed a replacement.

Printed at 40% cubic infill with Elegoo ASA for UV/Temperature resistance, and durability. I've not field-tested it yet, only fitment and standing up the grill. You may need to increase infill.

.28mm Height with variable layers at +/- .2mm

**Printed on a raft with supports** at 60 degrees. Supports were easily removed. Printed hole-down so it wouldn't split when slipping it onto the bar. It was not an extremely tight fit. YMMV.
