### Summary

a fastly printed thing to flatten the angle of your Display on K1/K1 Max

Tags: [display](#) [creality](#) [angle](#) [k1](#) [k1max](#)

Since I'm used to standing relatively close to my printers, and the K1 Max is also placed on a not too high table, I didn't like the angle of the display. So, I designed this part to tilt the angle about 20 degrees flatter. I am very satisfied, and perhaps some of you can also make use of this.

I'm not sure, but I believe this will also fit the "normal" K1, if not, let me know, pls.

I printed it without supports.
