UPDATE (02.15): uploaded the wrong witch and witch_and_spells model, fixed

I have created this insert set for **Septima + Shapeshifting & Omens expansion**. This set replaces the paper ones that come with the game.

BOX INSIDE SIZE: 28.5x28.5x6.8 cm

I tried to make it functional and practical (as for using the inserts during the gameplay as well as making setup and boxing process easier). My purpose was to make the whole game experience even better, I hope you'll find it useful. I made the design in the mindset to have every piece in its place even if the box is turned around or stored in an upright position.

If you don't have the Shapeshifting & Omens expansion, you will still need the omen card holder and the placeholder for the animal

cards in the player trays, otherwise things will fall out and move around (and we don't want that to happen!).

The design was made with Fusion 360 and the insert trays are made of PLA.

Filenames will be your guidance for the purpose of containers, as well as the required pcs to be printed.

If you have any questions about the 3D model or the printing process, please leave a comment or send me a message.

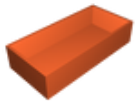

Also, I'd love to hear any feedbacks and make the design even better/more functional, so if you have an idea, feel free to share.

The design cannot be used for commercial purposes.

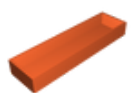

However, if you like it and found the insert helpful, please express your appreciation by supporting me on my Ko-fi link: [put some coffe on the table](#)

I'll be thankful if you do so. :)
