Push Pin Helper

Print with supports

My always wife used a hammer to put push pins in the wall. She either broke the push pin or cussed when she hit her fingers with the hammer. So I designed this amazing push pin helper. Use it to push by hand or as my wife uses it with a hammer.

3 different designs. V11 and 12 also works to remove pins. V11 - has a finger guard. V12 - has no guard and has a round version for the pin holder. V14 - Totally different design and super easy to use. Just insert Push pin.

There is slight wiggle room for the tack (V11 and 12). I had 2 slightly different sizes of tacks in the same container as well as slightly bent ones.

The wiggle room allows for variances in tacks, but due to this you need to hold the tack in place when putting it into the wall.

Please "Like", review, follow and upload make.

I spend a lot of time designing and allow it all to be used for free (including commercially).

If you'd like to help me out, below are the possible ways. Thank you in advance!
